LRBC

LEAN RESOURCE BUSINESS CONSULTING PVT. LTD.
HYDERABAD · LRBC.AI

From *paper* to systems.

END-TO-END DIGITAL TRANSFORMATION FOR INDIAN MSMES

We build software around **how your business already works**, not the other way round. Custom-built, affordable, and simple enough for everyone on your team to use from day one.

Illustrative example

Better systems. *Better business.*

FIELD NOTES

Factory to factory, looking for gaps.

WHERE THE DATA LIVED

- *Paper registers*
- *Excel — many versions*
- *WhatsApp groups*
- *Email threads*
- *Someone's memory*

"Too expensive. Too complicated. Not built for us."

— WHAT OWNERS TOLD US ABOUT ERPS

If one key person is on leave … the work waits.

OUR STORY

It started on the *factory floor.*

LRBC was born from a simple observation.

While doing market research, our founder went from factory to factory looking for gaps. What he found surprised him — even today, many small and medium-sized industries still rely heavily on paperwork and manual processes.

When we asked why they hadn't adopted ERP systems, the answer was clear: mainstream ERPs were too expensive, too complicated, and simply not built for their needs.

They were being asked to pay for dozens of features they didn't need, while still struggling with the problems that actually mattered to them.

> **That's where LRBC — Lean Resource Business Consulting was born.**

Our idea was simple: don't make SMEs adapt to software. *Build software around their problems.*

That led us to products like **LekhaSetu**, which connects and simplifies accounting data, and **WorkPilot**, which streamlines factory operations.

What makes us different is that our solutions are custom-built, affordable, and incredibly easy to use — so even someone with limited technical knowledge can adopt them quickly.

WHAT YOU LEAVE BEHIND

- ~~Delays in decisions~~
- ~~Bottlenecks~~
- ~~Scattered data~~
- ~~Key-person dependency~~
- ~~Rising costs~~
- ~~Paperwork~~

→

WHAT YOU GAIN

- ✓ Smoother processes
- ✓ Maximum efficiency
- ✓ Lower costs
- ✓ Customisation
- ✓ Managed changeover
- ✓ AI integration

THE GROUND REALITY

Growing businesses, *still running on paper.*

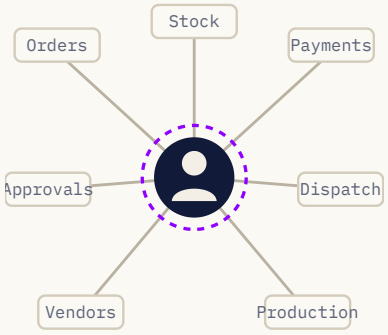

Our on-ground consulting across manufacturing, retail and services kept showing the same pattern. Businesses had grown, but the way they ran had not.

ANNUAL TURNOVER

₹30–50 Cr

Yet these MSMEs still depend almost entirely on manual, paper-based processes: registers, spreadsheets and follow-up calls.

Big business. Small-business systems.

One or two people *hold it all.*

Core operational knowledge sits with one or two key employees. When they are away or leave, orders, stock, payments and approvals stall with them, and the business is paralysed.

Why traditional ERPs *fail here*

01

Built for large corporates

Mainstream ERPs are engineered for big enterprises, not a ₹30 Cr factory.

02

Too complex, too rigid

Dozens of modules nobody asked for, and little room for how you actually work.

03

Too costly

Licences, implementation and consultants that most MSMEs cannot justify.

04

They change your floor

Owners are forced to reshape real operations to suit the software.

STEEP LEARNING CURVE → ADOPTION FRICTION → *a return to paper.*

THE LRBC ANSWER

Native, curated automation that *adapts to your business.*

Instead of forcing the business to fit the software, we build flow management, inventory management and lead management systems that live inside the tools your teams already use every day.

BUILT ON ACCESSIBLE TECH

Google Workspace · Apps Script · JavaScript · HTML · CSS · Tally · WhatsApp

Nothing heavy to install. Your team keeps working in familiar tools.

OUR PROPRIETARY PLATFORMS

Built around how you *actually* work.

Four ways in: from a single tool your team can start using this week, to a complete ERP shaped around your factories.

L LekhaSetu

YOUR ACCOUNTS, LIVE IN THE CLOUD

A dedicated sync app that connects your Tally financial data directly with Google Sheets and live dashboards: receivables, payables, stock and sales trends across every company and location. Real-time decisions, without disturbing your accounts team's workflow.

1,000+ hrs lost every year to manual Tally reporting, which LekhaSetu gives back

01 CONNECT Link your Tally data

02 SYNC Every few minutes

03 DECIDE Live reports, anywhere

W WorkPilot

FLAGSHIP

COMPLIANCE & DELEGATION

Digitises daily task delegation, attendance and operational tracking, with customised dashboards and role-based access designed around real factory operations. Not a bulky ERP: it spreads knowledge across the team and ends key-person dependency.

94% fewer manual follow-ups

01 ADD TEAM People, roles & departments

02 DELEGATE Tasks & progress, instantly

03 REVIEW Weekly performance reports

M Mini ERP

₹10–50 Cr

RIGHT-SIZED FOR GROWING BUSINESSES

Sales, purchase, inventory, accounts, reports and approvals, across every location, without the weight, cost and complexity of a full-scale system. Only the modules you need, at a cost that fits.

Sales · Purchase · Inventory · Accounts · Approvals · Multi-location

01 UNDERSTAND Your business & locations

02 CONFIGURE Only what you need

03 GO LIVE Training & support

C Custom ERP

₹50 Cr+

BUILT AROUND HOW YOU RUN

A cloud ERP designed around your own workflow, from order to plan, produce and dispatch. Any team size, any number of factories, with secure storage, automatic backups and role-based access.

Order · Plan · Produce · Dispatch · Backups · Role-based access

01 STUDY Your processes

02 DESIGN & BUILD Workflows made for you

03 DEPLOY Rollout, training, care

What makes us *different*

01

Custom-built

Designed around your process, never a generic template you have to bend to.

02

Affordable

Pay for what you actually need. Nothing more, no dozens of unused features.

03

Easy to adopt

Simple enough that anyone on your team, even with limited technical knowledge, picks it up quickly.

We walk your floor *before* we write a line of code.

Beyond our platforms, we engineer custom systems for the bottlenecks that slow your operation down. Every engagement starts on the ground, and we stay until your team uses the system with confidence.

01 ---- 02 ---- 03 ---- 04

Understand

We study your processes on the ground, talk to the people who run them, and map where time and data get lost.

Design

Workflows, dashboards and role-based access shaped around your operation, agreed with you in a clear Statement of Work.

Build

We develop on tools your team already knows, so there is less to learn and nothing heavy to install.

Adopt

Rollout, training and ongoing support, until the system is simply how work gets done.

WHAT WE BUILD FOR YOU

01

Live inventory & production tracking

Full transparency on the production floor, from raw material in to finished goods out.

- Custom machine input–output models
- Live SKU generation sequences
- Real-time stock across locations

02

Automated lead & dispatch management

CRM built around how your sales and dispatch teams already work.

- Custom dispatch tracking
- Dynamic dashboard reporting
- Event-driven WhatsApp alerts via Zapier and Maytapi

03

Strategic operational consulting

Hands-on process restructuring for existing enterprises across hospitality, chemical manufacturing and retail.

- Process mapping & restructuring
- From the first Statement of Work...
- ...to full-scale operational transformation

CONSULTING FIRST, SOFTWARE SECOND

We already know your bottlenecks *from the inside.*

LRBC grew out of operational consulting. Our software is rolled out first with the businesses we already advise, where we understand the internal bottlenecks in detail. That is why adoption is fast, and why what we build keeps working long after go-live.

IN OUR CLIENTS' WORDS

Built for their needs, *not a standard product.*

> We engaged LRBC to streamline our internal systems. They provided a true end-to-end solution, from initial inquiries and the complete sales process to our manufacturing and stores modules. Our dependency on manual effort has reduced significantly.

Prabhu Pandurang
CEO · CHEFMATE

> They spend time understanding your business and offer products made specifically for our needs, rather than pushing any standard product. This keeps operations and learning simple and cost-friendly.

Varun Bathwal
CEO · ARV

> Team LRBC is highly capable, particularly in process optimisation for business owners. I consult with them for technology solutions and consistently receive valuable and meaningful insights.

Kanul Verma
EXECUTIVE DIRECTOR · HITCO GROUP

INDUSTRIES WE SERVE *Plastics · Woven sacks · Kitchenware · Wire & steel · Chemicals · Hospitality · Retail*

Where we *stand today*

INCORPORATED

Private Limited company

Lean Resource Business Consulting Private Limited, incorporated under the Companies Act, 2013, in Hyderabad, Telangana.

RECOGNISED

DPIIT · Startup India

An active DPIIT-recognised startup under the Government of India's Startup India programme.

REGISTERED

Udyam · MSME

Udyam-registered micro enterprise in the services sector. We are an MSME building for MSMEs.

GROWING

A dedicated unit for WorkPilot

We are setting up a dedicated Strategic Business Unit (SBU) focused on the continuous development of WorkPilot and on taking it to many more businesses.

PROVEN

From observation to solutions firm

What began as an on-ground market observation is now an enterprise solutions firm with live products and clients.

From paper to systems — *and then to smart* operations

Our journey doesn't stop at digitising paperwork. We're building a connected suite where every business process in an SME has its own simple, affordable tool,

PHASE 1 · LIVE TODAY

Systems *in place*

Products already running in Indian factories and offices.

LekhaSetu LIVE
Tally to cloud dashboards

WorkPilot LIVE
Delegation, compliance & attendance

Mini ERP LIVE
Lean ERP for ₹10–50 Cr businesses

Custom ERP LIVE
Built around your workflow

PHASE 2 · NEXT

A tool for *every process*

Ready-to-deploy modules that plug into one connected system.

WorkPilot SBU NEW
A dedicated unit to grow WorkPilot

Sales & CRM
Leads, quotations, follow-ups

Purchase & Stores
Procurement, inventory, stock alerts

Production Planning
Job scheduling, machine-wise output

Quality Control
Inspection checklists, rejections

Dispatch & Logistics
Pre-dispatch planning, delivery tracking

Maintenance · HR & Attendance
Service schedules, shifts, payroll inputs

> "We're essentially taking businesses from *paper to systems* — making their operations faster, smarter, and more organised.
